MIAMI UNIVERSITY

SIGHT Project - Meeting 14

Project Name: Safety Immersion and Gamified Hazard Training for Industry 5.0 Workers
Project Number: WSIC26-250206-009
Date: February 6, 2026
Time: 11:00 AM EST
Location: Zoom
Meeting Focus: Updates on VR/AR Developments and the Discovery Center's Requests

Attendees

- **Miami University (MU):** Fadel Megahed (PI), Ibrahim Yousif (Post Doc), Reza Abrisham Baf (Senior Personnel), Michael Wise (GRA), Austin Hamilton, Ryan Singh, Amanda White, Mohamed Farrag (PM)
- **Discovery Center:** Yue Li, Kristen Morio, Maressa Dixon
- **MeetKai:** Jacquie Babakanian (Chief of Staff), David Arcia, Andre Amorim, Artur, Declan L, Anushree Banerjee, Vincent Cheong, Alexander Elert
- **MaxByte:** Ramshankar CS (CEO)

1. Agenda Summary & Approval of Minutes

- **Administrative Updates:**
  - Fadel Megahed opened the meeting with administrative updates regarding the BWC and project timelines.
  - **Financial Reporting:** The invoice and expenditure report were submitted to the BWC. A few additional details requested by BWC were resubmitted on Feb 5; approval is expected soon..
  - **OSC Poster:** The project poster for the Ohio Safety Congress (March 11–13) is finalized. It contains more text than usual to provide context for unmanned viewing sessions.

2. Industry Partner Updates

A. MeetKai (Presented by David Arcia)

- **Mobile Compatibility:** The demo is now fully mobile-compatible and stable across browsers, including a fix for a Firefox shader compilation bug.

- **User Feedback:** Initial results show a preference for circular progress bars. Modules for PPE and cleaning are highly rated, while loading workpieces is viewed as "dry" and needs more interactive "hands-on" mechanics.
- **Cobot Module:** Proposed a "pendant frame" UI for mobile to maintain immersion. Development is focusing on inverse kinematics for realistic joint movement and a playback feature for programmed paths.
- **Requests:** MeetKai requested the "Initial User Diagnostic Survey" to integrate into the training flow to help the AI assistant tailor its guidance based on user experience levels.

B. MaxByte (Presented by Ramshankar CS)

- **AR UX Enhancements:** Moving toward a side-by-side UI layout to avoid obstructing the user's view through the Magic Leap glasses.
- **Hardware Shipping:** The Autonomous Pallet Truck is expected at the MU Hamilton campus on Feb 9.
- **Connectivity Progress:** Proof of concept for real-time data via MQTT is successful. The team plans to connect all three machines to the Byte Factory MES by month-end. MaxByte will temporarily move the Dell Hub tower between machines to further facilitate configuration.

3. Other Updates

- **BWC Presentation:** Fadel and Mo are presenting project progress to the BWC on Feb 26. The team needs to provide two summary slides by Feb 18.
- **Discovery Center:** Maressa Dixon announced that key personnel interviews and focus groups will commence in February and March to support the June annual report.

4. Action Items

Task	Responsible	Deadline
Share the Digital Twin video for the Cobot and share examples of the human-cobot collaboration	Ibrahim Yousif	Feb 10, 2026
Finalize hardware scope for sensors/DACs	MaxByte / MU	Feb 13, 2026
Provide a total of 4 summary slides for BWC's Q2 presentation	MU Team with partners	Feb 18, 2026

Deliver the pallet truck	MaxByte	Feb 09, 2026
Set up the Pallet Truck	MaxByte	Feb 20, 2026
Submit the user diagnostic survey content to MeetKai	MU Team/Lora	Feb 20, 2026
Finalize data acquisition from the three machines	MaxByte	Feb 27, 2026
Coordinate key personnel interview schedule	Maressa Dixon	In a few weeks

5. Wrap-Up & Next Meeting

- **Next Meeting:** February 20, 2026, at 11:00 AM via Zoom. There will be a separate a zoom link for the next meeting as Fadel will be traveling (but to reduce email notifications, we will not be updating the link on the calendar invite).
- **Focus:** BWC presentation finalization and Pallet Truck configuration updates.
